**10mg Lemonades have 0 calories & 0 sugar.** How are they so delicious and **slightly sweet?**

These 10mg Lemonades are sweet, but with 0 calories and 0 sugar, thanks to a combination of two natural sweeteners: **monkfruit** and **allulose**. **Monkfruit**, a small green gourd from Asia, contains calorie-free mogrosides that provide intense sweetness without adding any calories. **Allulose**, a sugar found in fruits like figs and kiwis, adds sweetness but with so little actual sugar that it contains virtually 0 calories and doesn't raise blood sugar levels.
